# Mines and Mining Stocks

# **BULLION-BECK**

United States Company Gets

pany, one of the subsidiary companies of the United States company. Something over 50,000 of the 100,000 shares in the company were involved in the transaction, and the price paid, while not made public, is known to have been considerably more than \$2 a share. Mr. Farnsworth still retains a block of the stock and, while he surrenders the presidency and general managership of the property, and general managership of the property, alice as a director. The property adjoins the Centennial-Eureka on the north and is still one of the big mines of the Tintic district. It paid a 10e dividend in July and has a record of \$2.768,400 to date.

Following the transfer of the stock the directors of the Bullion-Beck company and representatives of the purchasing company met. Four of the seven directors resigned, and their places were filled by W. M. Bradley, C. E. Allen, Frederick Lyon and George W. Heintz. Mr. Bradley was named as president to succeed Mr. Farnsworth, and C. E. Allen, Frederick Lyon and George W. Heintz. Mr. Bradley was named as president to succeed Mr. Farnsworth, and C. E. Allen, effective Lyon and george W. Heintz. Mr. Bradley was named as president to succeed Mr. Farnsworth, and C. E. Allen, of course, will be made general superintendent of the mines, as he is of all the Unites States company's properties in this state. In addition to those mentioned, the board of directors now contains the names of Joseph F. Smith, who remains as vice president and treasurer; Philo T. Farnsworth and James A. Cunningham.

The deal, it is understood, has been pending for several months, and its consummation has been accomplished since the arrival here of President W. G. Sharp and Managing Director A. F. Holden. The property has been in control of Mr. Farnsworth for several years.

# MINING STOCK EXCHANGE. GOLD ORES ARE Unsettled Condition. For Monday the market did not exhibit For Monday the market did not exhibit such good form as might have been expected. During the opening session the accumulation of over-Sunday orders caused the list to hold pretty steady, but it looked different in the afternoon. By that time orders were filled and the trading appeared to be almost exclusively professional. There was a shrinkage of prices in consequence and the day closed with unmistakable signs of weakness. The favorites-Colorado, Iron Blossom, Sioux Consolidated and Carisa-each had a struggle to maintain their positions and.

Boston, Oct. 19.-The United Metals Selling company, which has been holding the ing company, which has been holding the price of copper at 13%c or 1/4c above the market, for some weeks, has reduced its asking price to the market level of 13½c, thirty days. All of the selling interests have about caught up with their orders, and unless substantial sales are effected within the next two weeks, stocks should begin to accumulate in this country. There will be, of necessity, large sales of The Uncle Sam Consolidated company's There will be, of necessity, large sales of copper around 13½c per pound before any advance in the price of the metal can be looked for. Leading copper trade authorities estimate that there are not over 50, 100,000 pounds of refined copper in this country available for immediate delivery.
The copper mined in July is now available, having been electrolytically refined.
The increased production which has come from Butte. Cananea and Ely is not yet heavy, but will soon be.

The Taylor & Brunton sampler yesterday reported the release of five cars of ore from Utah mines.

Eight carloads of ore from Utah mines, one from Nevada and one from Idaho were released from the Pioneer sampler yesterday.

#### AMERICAN FORK MINES.

News From Properties That Are Bringing Old Camp to the Front.

Hardy, a mining engineer of Salt Lake, has been experting the Merrill lease prophas been experting the Merrill lease property in the Mary Ellen gulch. He is favorably impressed with the company's excellent holdings in that vicinity. This company has secured the services of Ned Wild as manager, and he will immediately take hold and push development work. The miners are following a five-inch vein of fine looking ore and are making good progress. On reaching the porphyry dike, about seventy-five feet ahead, it is expected they will open up ore in shipexpected they will open up ore in ship-ping qualities.

Encouraging reports come from the Silver Flat property in Deer Creek canyon. The miners have encountered a vein of rusty porphyry which carries good lead values. Those who have examined the rock think that there is a likelihood of breaking into the ore bodies at any shot. The Osborn Mining company held its regular annual meeting Thursday night and elected a new board of directors. S. Osborn was elected president and K. M. Christensen secretary and treasurer, with James Julian, William Craig and James Guyette as directors. A block of the treasury stock has been sold and exten-sive developments are in progress. This company owns some very promising ground in the mouth of Dry Creek can-

Tyng brothers are doing some extensive Tyng brothers are doing some extensive development work on their Texan group of claims on the Miller hill. They are running a tunnel from the lower side to tap the extensive ore bodies which are thought to be there. This tunnel will be about 800 feet long and when completed will be one of the best tunnels in the district. The Texan group is surrounded by good producers, having the Miller mine on the west, the Dutchman on the south and the Mountain Dell and Blue Rock on the east. It seems impossible for the

shows native gold and black sulphurets of silver in the same chunk.

These samples come from various workings on the Therien. Kindergarten and the Seven Troughs mine, and they illustrate as nothing else possibly could the character of the deposits that have been made by nature in the hidden treasure vaults of the properties named.

It takes a good deal to rouse and excite the imagination of the ordinary Utah mining man. He can read of gold strikes and silver strikes and copper strikes till he becomes wearied, and he can nearly always be depended upon to witness them without getting excited. It has got to be something away out of the ordinary to move him; he is so calloused to the business. Old stagers were stirred up by the exhibit mentioned yesterday.
